

Take the first step toward Green Ticketing

100% Recycled Thermal Ticket Stock

National Ticket Company is proud to be able to provide Forest Stewardship Council (FSC)-certified products. Our 100% Recycled Thermal Ticket Stock comes from well-managed forests certified by the FSC. The FSC is an international organization that promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests. Visit www.fsc.org to learn more.

These safety features are available in standard thermal stock as well as recycled thermal stock:

- UV Traceable Ink
- Coin Reactive Ink
- Foil Stamping
- Rub and Reveal Ink
- Thermochromatic Ink

While recycled thermal ticket stock is our newest green initiative at National Ticket Company, it is not the only one. We were environmentally conscious long before the term "going green" was popular. The following are some of our other initiatives that support the environment:

- More than 85% of our production waste is recycled.
- 25 years ago, we eliminated hazardous waste from our plate making.
- We have converted our printing processes from oil based inks, to water based inks.

Thermal Point-Of-Sale Ticket Stock

High quality, fan-folded, machine-issued Thermal Point-of-Sale Ticket Stock suitable for all types of automated box office and admission systems.

VERSATILITY

Pre-printed stock, or customized with your logo and text for use with all types of thermal printers. Enhance your tickets by adding your company logo or offset the cost by adding a sponsor's logo. **Thermal wristbands are also available.**

VALUE

Quality products, guaranteed accurate in every detail, backed by outstanding customer service.

SECURITY

Protect your investment with bar codes, holograms, foil, safety stocks or security inks to help deter counterfeiting.

WHAT'S NEW
